Oklahoma Firm Touts Partnership with Leading Manufacturers to Improve Success Rates in Regenerative Medicine

The training program is customized to the skill level of the physician - from novice through advanced level users. Being in a position to support a world-class training program from GulfCoast Biologics, and a world-class manufacturer of Regenerative Medicine Products is an amazing accomplishment for iRad.

Who is Mindray?

Mindray is a global manufacturer of top-quality ultrasound equipment. The Mindray portfolio includes portable and console systems - competing directly with the best ultrasound systems from GE and Philips. iRad has a unique relationship with Mindray in building the MSK Ultrasound market in the US. Beyond the TE5 MSK Ultrasound, we also sell the M8, M7, and now also multiple console systems. The TE5 MSK Ultrasound is considered as the best ultrasound available for Orthopedics, Sports Medicine, Pain Management, and Regenerative Medicine - providing the highest-quality needle visualization and tissue differentiation for diagnostics.

Who is Emcyte?

Emcyte is a manufacturer of Regenerative Medicine kits products for PRP and Bone Marrow Stem Cell. They are recognized as the top in the industry with the best-in-class Regenerative Medicine products.

Who is iRAD, LLC?

iRad was formed in 2019 to provide Hospitals, Imaging Clinics & Physician Offices the Gold Standard of Imaging Equipment and Service. We work with a variety of high end manufacturers to ensure that we are providing our customers with the best possible solution that is cost effective and will meet their long term needs.
